LITTLE  
**BLACK BOOK**  
OF MOULDINGS

**MYTH OF THE LITTLE BLACK BOOK**

Everyone knows that a little black book contains powerful (and sometimes secret) connections and information.

In the 50's and 60's everyone had a little black book—powerful businessmen, CIA agents and even your dad. It was that special place where you kept information and numbers most important to you.

Today the little black book has morphed into the electronic version of itself, whether it's a laptop or smart phone—everyone has one.

**ALL YOU KNOW IS** you'd be lost without it. This little black book is special and unique. It's your own personal code book of mouldings—all the details you need in one place to ensure that every job you do is better than the last.

**HOW TO USE THE LITTLE BLACK BOOK**

All items are separated into their respective categories, i.e. casing, base, crown etc. Within each category, we have placed items in order by size. For example, if you are looking for a 5-1/4" crown, locate that size in the crown section and view all crown profiles available in that size range together. If you are looking for a 7-1/4" base, go to the base section, find the 7-1/4" size and all 7-1/4" profiles will be found together. Now the choice is yours!

**GO GREEN!** EL & EL supports responsible forest management in all our products. All structures should use two categories for determining how green they are: toxicity and the sustainability of their components. Several of the products that we distribute, qualify to earn LEED points for Green Building Products. FSC is notably the most recognized green certifier in America, however according to John D. Wagner, a leading green expert in the building industry: "Nearly all wood fiber in North America falls under some sustainable harvest third party standard. FSC, SFI, ATE, PERC or CSA. The only one of these that sells at a true premium is FSC." There are many green products that are not FSC yet meet the same requirements and specifications for responsible forestry management and are certified by other green certifiers at a no cost premium. For more information visit: [www.johndwagner.com](http://www.johndwagner.com)
